

Vision Area 3: Safe Physical Environments

Objective 16: Reduce Salmonella infections transmitted through food

Salmonella infections due to contaminated food products make many people ill each year and are responsible for substantial economic costs. Salmonella infections are potentially serious and may be fatal, particularly for the elderly and people with weak immune systems.

Statistics and Goals

Measure: Rate of salmonella infections (per 100,000 population)

Source: Centers for Disease Control and Prevention, FoodNet and Maryland Infectious Disease and Environmental Health Administration

National Baseline	Maryland Baseline	Healthy People 2020 Target	Maryland Target
15.2	14.1	11.4	12.7
